

Art

This term we are exploring portraits.

MILD Use a mirror to look at your face and then make a self-portrait. Look carefully at the colour of your eyes and hair. Use pencils, crayons or paint (whichever you have available).

MEDIUM Make a portrait for everyone that lives in your home. Make sure you take time to look carefully at their features before you start. You could make frames for your faces.

HOT Explore some famous portraits - either online or at a museum (for example, The Ashmolean). Choose one that you particularly like. What do you like about it? Can you guess what this person was like?

Maths

We are exploring 3D shapes.

MILD Can you find a cone, sphere, cube, cuboid, pyramid and cylinder in or around your home? Make a tally chart for each room and compare your results.

MEDIUM Make a junk model with a range of boxes and containers. Which 3D shapes make the best models?

HOT Explore what 3D shapes look like when they are flattened out (net). You can do this by very carefully cutting along their edges. You could draw around their nets and compare.

R.E.

We are exploring the Christian Nativity Story

MILD Make a set of characters to retell this special story. You could make paper finger puppets or lolly stick puppets. Perform the story to someone at home.

MEDIUM Make a map to show the journeys from the Christmas story. Key characters are Mary, Joseph, Angel Gabriel, Shepherds and the kings. They all make journeys and should be included in your map.

HOT Write an account as if you were one of the characters from the Nativity story. What did you see and what did you do?

Bring your Home Learning into school to show during the week beginning Monday 11th December (photos are fine).
